

Neuroimaging and Clinical Neuroscience Research Short Course

The Centre of Clinical Research Excellence in Neurosciences, University of Melbourne in partnership with the Brain Research Institute offer this successful short course again in August 2007.

The multi-disciplinary course is designed specifically for clinicians from all health disciplines interested in conducting clinical research involving functional disorders of the brain and mind. The course is also open to other researchers or health professionals interested in learning about cutting-edge human brain imaging and associated research methodologies.

The course can be taken with or without assessment. Places are limited to 20.

This intensive course is part of the Specialist Certificate in Clinical Research (Neuroscience) accredited by the University of Melbourne.

Course dates are: August 20th, 21st, 22nd and 24th 2007

Venue: Neurosciences Seminar Room, Neurosciences Building,
Heidelberg Repatriation Hospital (Austin Health), Banksia
Street, West Heidelberg, Melbourne Victoria.
